

# Technical Advisory Committee Update

Kyle Chard

# NDS Technical Advisory Committee (TAC)

---

Kenton McHenry, Jim Myers, Jarek Nabrzyski, Ray Plante, Matt Turk

# The role of the TAC

---

- Provide feedback on development roadmap and product features
  - Ensure NDS is novel and relevant and not duplicating efforts
  - Point of contact with developers via a technical coordinator
- Provide outreach and advice on engaging technical stakeholders of synergistic data projects
- Track technical aspects of other synergistic initiatives and suggest linkages
- Provide feedback and endorsement of pilots and working groups or taskforces

# Recent Activities

---

- Review upcoming development activities in the work breakdown structure
- DataDNS: SC demo, proposal, and work plan
- Formalized pilot project request process and development team interactions
- Reviewed and endorsed pilot projects
  - Universally accessible data publication
  - Educational Workbench for Data Curation
- Working on goals for the next year
