Connecting people and resources to accelerate discovery by empowering the science gateway community

Science Gateways: Addressing Data Management Challenges

Sandra Gesing Center for Research Computing, University of Notre Dame sandra.gesing@nd.edu

7th National Data Service Consortium Workshop, Chicago 13 April 2017

Award Number ACI-1547611

Data

- Explosion in the quantity, variety and complexity of data
- Questions can be answered impossible to even ask about 10 years ago
- Costs far reduced (e.g., Human Genome project, 15 years, ~ \$2 billion; today ~3 days, \$1000)

Data

3

SGCI

http://www.genome.gov/images/content/cost_per_genome_oct2015.jpg

Challenges

- 1. Meaningful data aggregation and analysis
- 2. Real-time analytics
- 3. Privacy and security demands
- 4. Lack of usability of solutions
- 5. Missing integration of data sources and instruments
- 6. Complicated US and European privacy laws on health data
- 7. Diversity of stakeholders
- Technical solutions can
- address the first five challenges
- assist with data and measures for easing policies on health data
- support diverse user roles via easy-to-use end-to-end solutions

SGC

4

Science Gateways

- Increased complexity of
 - today's research questions
 - hardware and software
 - skills required
- Greater need for openness and reproducibility
 - Science increasingly driving policy questions
- Opportunity to integrate research with teaching
 - Better workforce preparation

5

We need end-to-end solutions that provide broad access to advanced resources and allow all to tackle today's challenging science questions.

6

SGCI

Gateway users are 77% of active XSEDE users in Q4 2016

This is largely due to the CIPRES and I-TASSER gateways, but others are gaining

Science Gateways Survey 2014

8

- sent out to 29,000 persons
- 4,957 responses from across domains
- 52% from life, physical or mathematical sciences
- 32% from computer and information sciences or engineering
- 45% develop data collections
- 44% develop data analysis tools

Science Gateways Survey 2014 Well-designed gateways require a variety of expertise

Typical Lifecycle of a Science Gateway

Science Gateways Community Institute

- Diverse expertise on demand
- Longer term support engagements
- Software and visibility for gateways
- Information exchange in a community environment
- Student opportunities and more stable career paths

Scientific Software Collaborative

12

SGC

High-level design of the scientific software collaborative

Opportunities

- Get advice (sustainability, usability, cybersecurity, other) on your existing gateway
- Work with SGCI to build a gateway for you
- Find a working gateway or gateway development software in our catalog
- Learn how to set up a gateway group on your campus
- Keep up to date on gateway developments
 - webinar series, gateways in the news, google scholar feed, case studies, annual conference, blog posts
- Enroll a student in an internship program to learn gateway development
- Partner with SGCI on your own projects, technologies and events

Se

Thanks for your attention!
